

IN THE SPECIFICATION:

Please amend the specification as follows:

Please amend the following paragraph:

--**[Para 52]** The rear view module also contains a rear illumination bulb. The rear illumination bulb is connected to a power light source by a ~~fiber-optic~~ cable. ~~Light from the light source is transmitted via this cable to the rear illumination bulb.~~ The rear illumination bulb uses this light to illuminate the area under view of the rear image lens. The rear image lens and the rear illumination bulb are typically activated upon deployment of the rear view module. The rear view module is deployed using an actuator. --
